RUTUJA DINKAR MORE

Data Analyst | Data Science Fresher | BE Information Technology – 2025

rutujamore2624@gmail.com | +91 8624871824 | Pimple Saudagar, Pune | github.com/rutujam24

PROFESSIONAL SUMMARY

Results-oriented Data Analyst and Data Science fresher (BE IT – 2025) with hands-on project experience in Python, SQL, Power BI, Machine Learning, and Exploratory Data Analysis (EDA). Proficient in data cleaning, preprocessing, ETL workflows, feature engineering, and predictive modeling using Pandas, NumPy, Scikit-learn, Matplotlib, and Seaborn. Experienced with Jupyter Notebook, Streamlit, and Flask for end-to-end model deployment. Passionate about extracting actionable insights from data and building data-driven solutions to solve real business problems.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Data Analysis & EDA: Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing, Data Transformation, Feature Engineering, Statistical Analysis, Trend Analysis, Data Storytelling

Machine Learning: Supervised Learning, Regression Models, Classification Models, Predictive Modeling, Model Evaluation, Scikit-learn

Data Visualization & BI: Power BI, Excel Dashboards, Interactive Dashboards, KPI Reporting, Matplotlib, Seaborn, Data Visualization

Libraries & Tools: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Jupyter Notebook, Streamlit, Flask, Git, GitHub, Excel

Database & ETL: SQL, MySQL, Data Pipeline, ETL, Data Modeling, Data Warehousing Concepts

Business & Analytical: Business Intelligence, Business Analysis, Analytical Thinking, Data Reporting, Decision Making, Strategic Planning

Soft Skills: Problem Solving, Critical Thinking, Communication, Attention to Detail, Multitasking

PROJECTS

Predicting Machine Failure | Python | Scikit-learn | Pandas | NumPy | Git *2024*

- Built an ML predictive model to identify potential machine failures in advance, achieving 88% classification accuracy using Decision Tree and Random Forest algorithms.
- Performed feature engineering on 10+ sensor variables and maintained version control (Git/GitHub) for full reproducibility and collaboration.
- Helped reduce simulated maintenance costs by ~30% through early failure detection, improving overall production efficiency.

Delivery Duration Prediction | Python | Scikit-learn | Linear Regression | Pandas *2024*

- Developed a Linear Regression model to predict estimated delivery time with an R^2 score of 0.82, improving logistics planning accuracy.
- Conducted EDA on 5,000+ delivery records, applied feature engineering, and reduced prediction error (MAE) by 18%.

Loan Status Prediction | Python | Decision Tree | Streamlit | Flask | Git *2024*

- Built and deployed an ML classification model (Decision Tree) to predict bank loan approval status with 91% accuracy.
- Delivered the model via a Streamlit web app and Flask REST API, enabling real-time predictions for end users.

Uber Ride Analytics Dashboard | Python | Pandas | Matplotlib | Seaborn | EDA *2024*

- Analyzed 148,770+ ride bookings across multiple vehicle types using Python (Pandas, Matplotlib, Seaborn) in Jupyter Notebook.
- Identified peak demand hours, top-performing zones, and customer trends, providing actionable insights to improve operational efficiency.

Online Mobile Shop Sales Dashboard | Power BI | DAX | KPI Reporting *2024*

- Designed an interactive Power BI dashboard with 8+ KPIs tracking sales performance, revenue trends, and product-wise insights.
- Enabled data-driven decision-making for business stakeholders through dynamic slicers, drill-throughs, and automated KPI alerts.

Speak-To-Database: NLP-Based Voice/Text to SQL System | Python | MySQL | NLP | Flask | Full-Stack *2025*

- Developed a full-stack web application enabling non-technical users to query a MySQL database using natural language text or voice commands.

- Implemented NLP-to-SQL conversion pipeline, reducing database query time for non-technical users by eliminating SQL knowledge requirements.
- Built ETL data pipeline for MySQL integration and deployed via Flask, with Git-based version control throughout.

CERTIFICATIONS

- **Advanced Certification – Master in Data Science | E&ICT Academy, IIT Guwahati**
- **JP Morgan Chase & Co. – Quantitative Research Job Simulation | Completion Certificate**

EDUCATION

BE – Information Technology | I2IT, Pune | Savitribai Phule Pune University *2025*

CGPA: 7.51 (67.8%) | Final Semester SGPA: 8.40

HSC – 12th Grade | Maharashtra State Board of Higher Secondary Education *2020*

Score: 63%

SSC – 10th Grade | Maharashtra State Board of Secondary Education *2018*

Score: 89.80%

Available immediately for Data Analyst / Data Science roles | Open to full-time & internship opportunities
